

# Mohamed Nasser

## SENIOR SOFTWARE ENGINEER

**10th of Ramadan, El Sharqia, Egypt | +201094641332 | mohamedengnasser20@gmail.com**

Married, Date of birth: 1995-08-22, Military status: completed

### Objective

---

Computer and Information Systems graduate from Zagazig University with over 6 years of hands-on experience in **PHP backend development** and **DevOps practices**. Proven ability to build and maintain scalable, secure, and high-performance web applications using **Laravel**, **MySQL**, and **Redis**, while also managing CI/CD pipelines, containerized environments, and cloud infrastructure using **Docker**, **Kubernetes**.

Highly collaborative team player with strong problem-solving skills and a continuous learning mindset. Actively seeking a challenging role as a **Senior PHP Developer with DevOps responsibilities**, where I can contribute to both application development and infrastructure automation. My goal is to grow into higher technical leadership roles while delivering impactful, maintainable solutions in a forward-thinking team.

### Experience

---

#### ALQEMAM QTECH & EXAS

*Full-time – Hybrid / Egypt / 2022 – Present*

**Team Lead – PHP Backend Development | DevOps | nodejs**

- Leading and mentoring a team of PHP developers to deliver scalable backend systems.
- Architected and deployed the **Quran mobile application** and a **contracts management dashboard** from scratch.
- Designed CI/CD pipelines using **GitLab Actions** and containerized environments with **Docker**.
- Handled Linux server administration, deployment automation, and monitoring using **Prometheus** and **Grafana**.
- Collaborated with frontend/mobile teams to ensure seamless API integration.
- Working in last project with new technology Nodejs.

---

#### ECUBES

*Full-time – Remote / Kuwait / 2021 – 2022*

**Senior PHP Developer**

- Led the development of a full-featured **hospital control panel** from scratch using **Laravel**, **MySQL**, and **Redis**.
- Integrated third-party APIs and ensured robust authentication and permission management.
- Optimized SQL queries and implemented job queues to improve backend performance.
- Supported production deployments in a cloud environment.

---

#### DEVNILE

*Part-time – Remote / Saudi Arabia / 2020 – 2021*

**PHP Developer**

- Developed backend dashboards and admin panels for a **poultry products management system**.
- Integrated product tracking, stock levels, and delivery modules using **Laravel**.
- Supported staging and production deployments on Linux-based servers.

---

## USMART

*Full-time – Remote / Saudi Arabia / 2019 – 2020*

### Junior PHP Developer

- Built and maintained APIs for **mobile application backends** using Laravel and REST principles.
  - Contributed to the architecture of order and user modules in large-scale applications.
- 

## ONCLICK

*Part-time – Remote / Egypt / 2019 – 2020*

### Junior PHP Developer

- Developed **eCommerce platforms** and **financial tracking applications**.
  - Collaborated on multi-tenant systems and implemented secure payment integrations.
- 

## BIT

*Part-time – Remote / Kuwait / 2018 – 2019*

### Junior PHP Developer

- Maintained and enhanced legacy codebases and migrated core functionalities to newer Laravel versions.
- Assisted in performance tuning and API bug fixing.

---

## Education

### Bachelor's Computers And Information: Computer Science

2013 - 2017

Degree Good – Zagazig University, Egypt.

---

## Courses

Devops - Senior Steps Center	2023 - 2024
PHP Laravel Framework - Senior Steps Center	2017 - 2018
Java - adf - Senior Steps Center	2016 - 2017
Java – SE & EE - Senior Steps Center	2015 - 2016

---

## Skills & abilities

---

### BACKEND DEVELOPMENT

- **PHP** – Strong proficiency in object-oriented and functional programming.
- **Laravel** – Advanced experience building REST APIs, queues, jobs, and artisan commands.
- **Laravel Nova** – Admin panel customization, resource management, and metrics integration.
- **MySQL** – Skilled in designing relational databases, query optimization, and indexing.
- **Redis (NoSQL)** – Used for caching, queue management, and session storage.

## DEVOPS & DEPLOYMENT

- **CI/CD Tools** – GitHub Actions, GitLab CI/CD, Jenkins for automated testing & deployment.
- **Containerization** – Docker: containerized Laravel environments; Kubernetes: orchestration for scalable applications.
- **Web Servers** – NGINX, Apache: configuration for PHP/Laravel apps.
- **Monitoring & Logging** – Prometheus, Grafana, ELK Stack: system and application performance monitoring.

## CLOUD & REALTIME SERVICES

- **Firebase** – Experience with Realtime Database, Authentication, and Push Notifications.

## FRONTEND DEVELOPMENT

- **HTML5 / CSS3** – Responsive and semantic markup for cross-browser compatibility.
- **JavaScript** – DOM manipulation, AJAX, and frontend integrations.
- **Bootstrap** – Rapid UI prototyping with grid system, modals, and components.

## COMPUTER SCIENCE CONCEPTS

- **Data Structures & Algorithms** – Solid foundation for problem-solving, debugging, and optimizing performance.

## PROJECT & WORKFLOW MANAGEMENT

- **Version Control** – Git, GitHub, GitLab: branching, rebasing, collaboration.
- **Agile** – Scrum & Kanban methodologies using tools like JIRA and Trello.
